

SAFE ROUTES TO SCHOOL – SKILLS TRAILER

WHY - Bike skill courses are a fun way to introduce and educate children to bicycle safety skills. The bike course will teach children the importance of seeing, being seen and remaining in control of the bike. This is accomplished through bicycle handling drills and activities. It is the goal of Safe Routes to School to provide students the opportunity to learn these skills.

WHAT – Bike skills trailer will provide bikes, helmets, course designs and supplies for the course. The bike skills program is designed to provide a tool for public safety to increase helmet usage and to teach children how to ride safely. The target audience is elementary school age children third grade to sixth grade.

WHERE – The trailer can be used for P.E. programs, after school programs, bike rodeos or other special events. The SR2S coordinators will bring the trailer to the location, set up skills course, help with helmet fittings and help or train teachers/staff how to use the trailer. The trailer can stay at the location while in use.

HOW – Reserve the bike trailer from the SR2S.
