Dora Erickson Elementary

Problem

Very long school traffic queues along Cleveland Street to Fanning Avenue during pick-up periods.

Parents are dropping off and picking up students in bus loading area.

Pedestrian/vehicle conflicts at Garfield Street and school exit driveway.

School buses and day care vans load in the same area.

Eagle Rock Junior High

Problem

School bus driveway is blocked by the queue spillback from the front parking area.

Traffic congestion/conflicts at special education bus area.

Vehicle queues from existing pick-up/drop-off area extend onto Pancheri Drive.

Pancheri Drive is not wide enough west of the school to allow for a left-turn lane into the pick-up/drop-off area.

Parents drop off students along eastbound Pancheri Drive and block through traffic.

Falls Valley Elementary

Problem

Students being loaded/unloaded across Virlow Street and in bus loading zone, instead of in designated areas.

Traffic congestion/conflicts on Virlow Street during school beginning/ending periods.

Southbound queues from the Hitt Road/1st Street traffic signal back through the Virlow intersection.

Hawthorne Elementary

Problem

School buses have great difficulty exiting alley onto South Boulevard due to sharp turning radius and poor sight distance. Must turn into 2 lanes of traffic when exiting right. Turning left is very difficult with 4-lane configuration of South Boulevard.

Dropping off/picking up students in bus area for kindergarten and special education on 16th Street.

Linden Park Elementary

<u>Problem</u>

School bus loading is behind the school property on Cambridge Drive.

Student pick-up/drop-off in the bus zone in front of school.

Mountain Valley Elementary

Problem

Traffic congestion and safety issues at the intersection of Wanda Street and Princess Drive.

Vehicle queues in the PM often back up past school driveways.

When late, parents sometimes drop off students at front door, not in designated area.

Temple View Elementary

<u>Problem</u>

Drop-off/pick-up on N Colorado Avenue instead of designated area. Students walk in-between buses.

Woodland Hills Elementary

Problem

Pick-up/drop-off congestion, with vehicle queues extending past the general parking entrance.

Student pick-up/drop-off occurs in the general parking lot not in designated zones.

Woodland Hills Elementary (Alternative #2)

Problem

Pick-up/drop-off congestion, with vehicle queues extending past the general parking entrance.

Student pick-up/drop-off occurs in the general parking lot not in designated zones.
